github.com/jenycodes Data science graduate passionate about analysing business data to improve performance. Seeking a role as Junior Data Analyst to apply my programming, SQL and visualisation skills, and help the company leverage data insights for growth.

Skills

- Programming: Python
- Visualisation: Tableau, Excel Charts
- Databases: MySQL
- Tools: MS Office, AWS
- Soft Skills: Critical thinking, collaboration, presentation and communication skills

Experience

Intern - Data Analyst

XYZ Finance, April 2021–September 2021

- Created a personal finance assistance chatbot with NLP for an existing application
- Studied the data of top 100 performing financial products to formulate a new product plan
- Analysed the web and mobile traffic to formulate content strategy

Education

WDC College

B.Sc. in Data Science and Business Analytics, 2018–2021

GPA: 3.75

Academic projects

- The project was focused on dealing with fake news with data analytics and natural language processing
- Used LIAR and FakeNewsNet datasets for analysis and classification of the news reports
- Implemented spaCy Python Library for natural language processing operations

Sentiment Analysis in R

- Developed a sentiment analysis demo for brand reputation management
- The demo could identify consumer's sentiment based on words classified into binary and multiple classes
- Used janeaustenR with Stanford Sentiment Treebank (SST) as the data set
- Developed a prototype of a web application using JavaScript and Python to improve the traditional fact-checking process

Certifications

- Data Science with R
- Python for Data Science
- Statistics essential for Data Science
